PROJECTS

- **Herbarium File (07/2019 - 01/2020)**: Created a repository of dried and pressed plant specimens. Mounted them on sheets in a systematic order along with all the information about that specimen on the same page itself.
- **AIDS Investigatory Project (09/2020 - 01/2021)**: Designed an investigatory project on HIV and AIDS. The project included important information about the syndrome and it's treatment with a questionnaire at the end.
- **Creatine Supplementation: How does is affect performance and health? (2022) (Research Paper)**: Research provided by numerous scientists using natural/artificial test settings, effectively computing the supplement's effects.
- **Super Bugs - END OF ANTIBIOTICS (2019) (Research Paper)**: Attended a travelling exhibition on super bugs to gain knowledge about them and wrote a research paper for submission to our biology professor.
- **Personal Portfolio website (2022) (Web Development)**: Created from scratch a responsive personal portfolio website with social media integration and SEO/speed optimisation
- **Advanced Calculator (2021) (Python)**: Capable of performing complex calculations, and with a click of a button it transforms into a scientific one (built from scratch). This calculator was developed in "sublime text editor 3" with over 300 lines of code.
- **Gaming addiction and it's other side (2020) (Article)**: An article which was featured in the school e-magazine.
